

Mr. **HONG PHUNG PHAT**

Senior Software Developer

Date of Birth: 30 Sep 1992
Phone: +84 764 74 99 64
Email: hpphat1992@gmail.com
LinkedIn: <https://www.linkedin.com/in/hpphat1992/>
Address: Binh Thoi - Ho Chi Minh City - Vietnam

As a Senior Web Developer with over 10 years of experience, I specialize in creating modern and efficient web applications. My expertise includes working with Angular and React to build user-friendly interfaces that solve real business problems. Throughout my career, I have successfully delivered projects for various industries, from social networks to data management systems. I take pride in writing clean, maintainable code and staying up-to-date with the latest web technologies.

In my current role, I focus on designing scalable applications and helping junior developers grow their skills. I am particularly interested in improving application performance and creating better user experiences. I am now seeking opportunities where I can use my technical skills and leadership experience to make a significant impact on challenging projects.

Education

Ho Chi Minh City University of Science

Bachelor Degree in Computer Science in Computer Vision and Robotics - 2010 - 2014

Experience

Backbase

Senior Software Engineer - Nov 2024 - Present

- Collaborate closely with project managers and the AI team to develop and implement AI-powered solutions for the banking sector
- Implement ideas and ensure it is following the release schedule

HCL Technologies Limited

Senior Software Engineer - Dec 2021 - Nov 2024

- Work with a team from a multi-country company to develop a DMS for managing documents of whole aerospace company using technologies: Angular 11-14, GoJS
 - Joining meetings in the Agile/Scrum process to understand, report and contribute to the development process
 - Raising some new ideas to improve the current UI/UX of the application
-

Saigon Technology Solution

Senior Software Engineer - Oct 2020 - Dec 2021

- Work in a team to develop a wealth management application using Angular, Ruby on Rails, SOLID principles
 - Joining meetings in the Agile/Scrum process
 - Contribution in the development process
-

Nashtech Vietnam

Senior Software Engineer - Dec 2018 - Oct 2020

- Joined the team to develop a web application for the wealth management domain of a bank
 - Joined meetings and followed the Agile/Scrum process
 - Using modern technologies at the running time: Kendo UI, moment, lodash
-

New Ocean Information System Co., Ltd

Software Engineer - Sep 2014 - Dec 2018

- Joined a team to develop an application based on Qt to send and receive data on a big network
- Joined a team to develop applications using modern technologies at that time (AngularJS, Angular, Reactjs)
- Helped to support other teams to review code
- Helped companies train for new comers

Projects

Backbase - Nov 2024 - Now

- Leading the development of AI-powered features in the company's main product using Angular. Implementing complex UI components and integrating AI services while maintaining high performance and accessibility standards.

Technologies: Angular, Bootstrap, Jest, Backbase, Rxjs

Environment: Webstorm, Github, Nx, Git, MacOS, Agile/Scrum

Role: Front-end Developer

Statrys - Sep 2022 - Nov 2024

- Developed a comprehensive fintech platform using both Angular and React. Led the migration of legacy components to modern Angular architecture while building new features in React. Implemented complex financial workflows and real-time currency conversion interfaces.

Technologies: Angular, ReactJS, TailwindCSS, Material, GraphQL, Jasmine, Karma, AG Grid

Environment: Visual Studio Code, Git, WebStorm, Chrome, Windows, Agile/Scrum

Role: Front-end Developer

PW - Dec 2021 - Dec 2023

- Built a sophisticated Document Management System for aerospace using Angular 14. Implemented complex document workflows, version control, and interactive diagram features using GoJS. Focused on performance optimization and seamless user experience.

Technologies: Angular, GoJS, ASP.NET

Environment: Webstorm, Git, Chrome, Windows, Agile/Scrum, Remote Desktop Connection

Role: Front-end Developer

Topicus - Web Application - Oct 2020 - Dec 2021

- Working for a Web application for managing entities relating to the Wealth management domain (order, invoice, payment, ...). The solution helps the bankers or wealth managers attract new customers and reduce the amount of work that can be handled automatically by the system.

Technologies: Angular, Jasmine, Karma

Environment: Webstorm, Git, Chrome, Windows, Agile/Scrum

Role: Front-end Developer

Finantix - Dec 2018 – Oct 2020

- Spearheaded the migration from AngularJS to Angular 7 for a comprehensive financial management platform. Developed responsive interfaces for order management, invoicing, and payment processing. Implemented wealth management demonstration tools for client presentations.

Technologies: AngularJS, Angular, Nodejs, IOS (Swift), Android (Java), SOLID principles

Environment: Webstorm, Git, Chrome, IOS, Android, MacOS, Agile/Scrum

Role: Front-end Developer, Mobile App Developer (Minor)

Trabble - Feb 2018 – Oct 2018

- Developed a tourism chatbot platform using both Angular 5 and React, showcasing versatility in modern frontend frameworks. Integrated multiple APIs (Facebook, Google Places) and implemented real-time communication features using SignalR.

Technologies: HTML, CSS, Angular, ReactJS, Nativescript, SignalR

Environment: Webstorm, Git, Chrome, Angular Cli, Azure portal, Invision, Trello

Role: Front-end and Back-end developer

There are additional projects not shown here.

Technical Skills

Programming Languages

HTML5, JavaScript, CSS,
TypeScript

Testing

Jest, Jasmine, Karma,
Protractor, ChaiJS, Sinon

Environments

Webstorm, Visual Studio Code,
Chrome, Windows, MacOS

Frameworks

Angular, AngularJS, ReactJS

Methodologies

SOLID principles, Agile/Scrum

Libraries

KendoUI, D3.js, jQuery, Chart.js,
RxJS, NgRx

Tools

Git, SVN, Webpack, Grunt,
Angular CLI
